
Q24 Marker search on all genes versus HVG only
Excluded genes are not necessarily unexpressed
HVG (n=2000)
excluded (n=11656)
density
fraction of cells with UMI > 0
Same raw P, different BH family
-log10 BH-adjusted P (HVG 2000 only)
-log10 BH-adjusted P (all 13656 genes)
