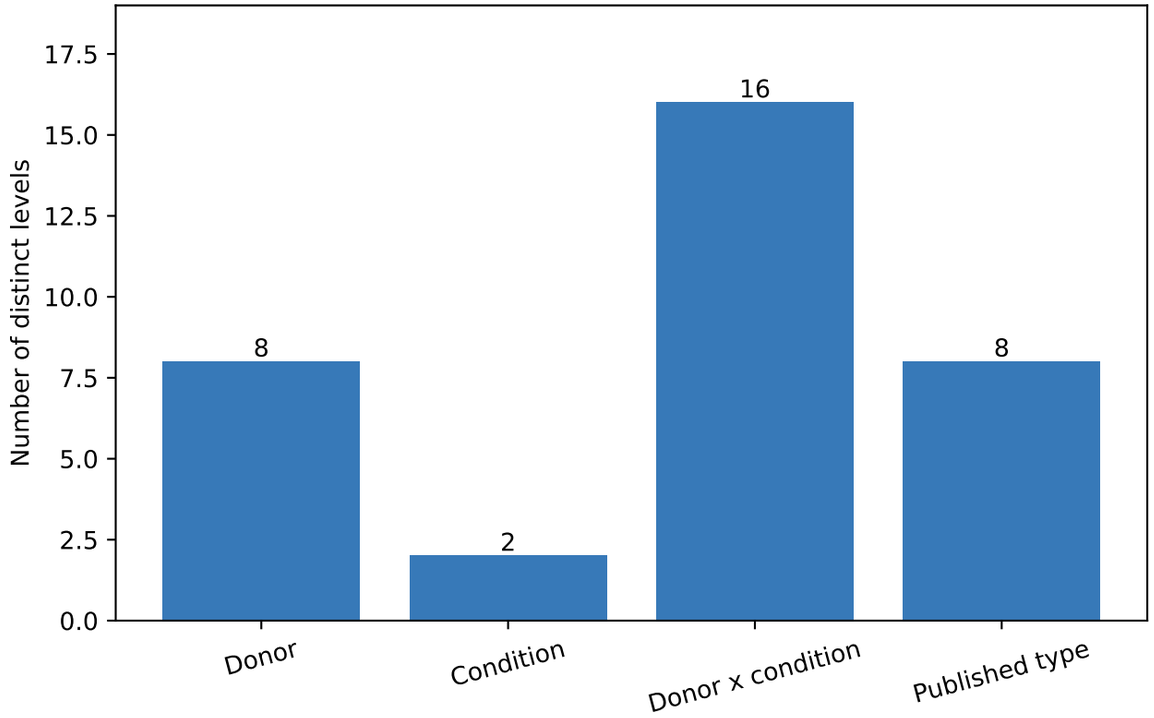
R18 | Inspect what the object actually contains
Counts alone do not supply normalization, velocity layers or spatial coordinates

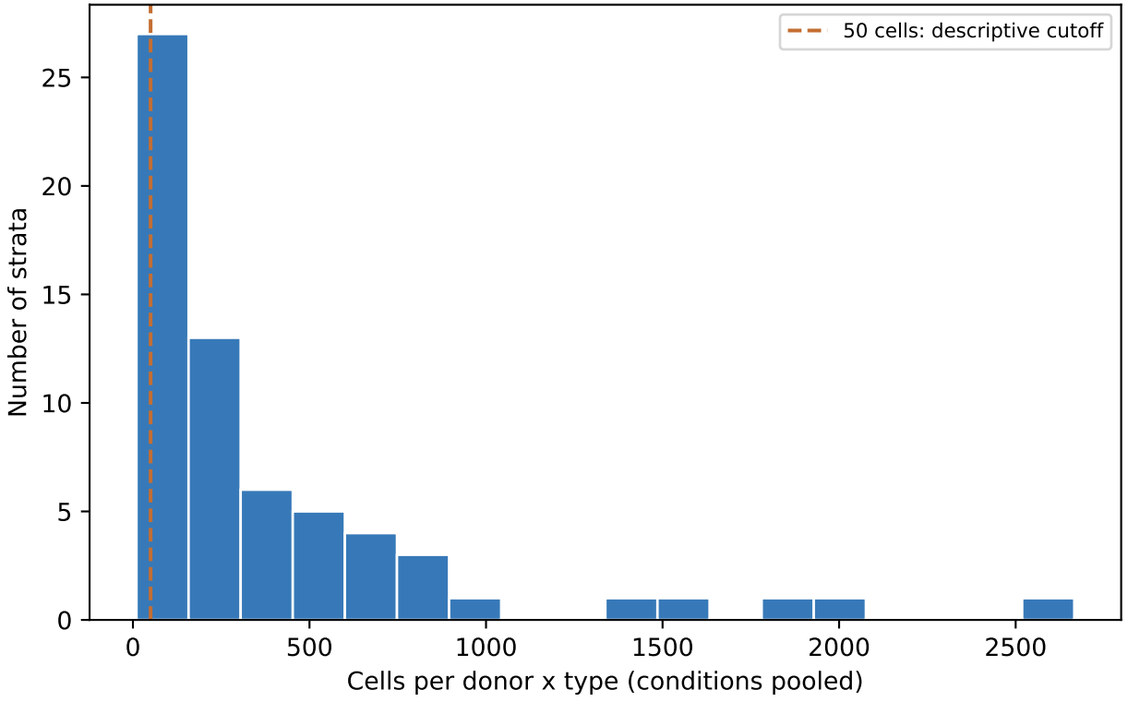
A Readback inventory

RNA layers	counts only
Matrix	35,635 genes x 24,562 cells
Raw UMI total	38,400,328
Integer values	Yes (stored as double)
PCA / UMAP dimensions	30 / 2
Origin	Teaching handover object

B Metadata coverage



C 64 strata; minimum 10; 13 below 50



D Raw counts; total matches metadata
